BioShield® 75

EPA
Registered

USDA
Accepted

Even though our medical facilities are among the safest in the world, surfaces touched repeatedly by a variety of people do get contaminated between cleanings.

BioShield®75 works continuously and provides an invisible biostatic protective film to prevent the growth of bacteria, fungi, mold, and mildew between these cleanings.

- Water based • EPA Registered • USDA Accepted on food contact surfaces • Odorless and colorless • Protects a wide range of surfaces • Highly durable • Non-toxic technology after drying • Prevents biofilm buildup • Long term prevention of a wide range of microbial growth
- Non-leaching, mechanical method of efficacy
- Can be wiped, sprayed, or misted on virtually any surface

- Waiting Rooms
- Bathrooms
- Pharmacies
- Ambulances
- Wheel Chairs
- Emergency Rooms
- Operation Rooms
- X-Ray Equipment
- Nurses Stations
- Examination Rooms
